### 9th Euchem Conference on Stereochemistry Bürgenstock, April 29 - May 5, 1973

President: **Richard H Martin**  
Guests of Honor: **Sir Robert Robinson**

	MONDAY – Moderator: <b>J M Lehn</b>
<b>H Wynberg</b>	Spiral spin-offs
<b>W von Philipsborn</b>	The present role of carbon magnetic resonance in structural chemistry
<b>R C D Breslow</b>	Recent studies on conjugated systems
	TUESDAY – Moderator: <b>J D Dunitz</b>
<b>R J Gillespie</b>	Some recent thoughts on the prediction of molecular geometry by the VSEPR theory
<b>L S Bartell</b>	Molecular structures, rigid and nonrigid; some guidelines
<b>O Sinanoglu</b>	Quantum theory of intramolecular forces and potential energy surfaces
	WEDNESDAY – Moderator: <b>G D Mateescu</b>
<b>G Binsch</b>	Time-averaged intensive parameters and molecular energetics in acyclic systems
<b>J Ficini</b>	Recent aspects of ynamine chemistry
	THURSDAY – Moderator: <b>E Havinga</b>
<b>G Schröder</b>	Recent advances in annulene chemistry
<b>J Reisse</b>	The screening constant problem in nuclear magnetic resonance
<b>L J Oosterhoff</b>	Stereochemical inferences from interaction of light and matter
	FRIDAY – Moderator: <b>V Prelog</b>
<b>L Ghosez</b>	Recent studies on polar cycloadditions
<b>H Kagan</b>	Some aspects of asymmetric catalysis by chiral rhodium complexes
<b>A R Battersby</b>	Porphyrins and corrins
